# Construction.

How the mark is built. Hexagon, chamfers, gutter, segments, radius.

## A hexagon. Two corners chamfered, four square.

A cross-shaped gutter divides it into four segments. All corners take a 4-unit radius.

### BASE GEOMETRY

### CONSTRUCTION SEQUENCE

### THE FOUR SEGMENTS

### CORNER TREATMENT

### SPECIFICATION

03

# The lockup.

Mark and wordmark, sized and spaced from a single module.

## 1u = the square's side.

Every measurement in this system is an integer multiple of 1u.

### THE MODULE

#### EQUIVALENCES

- 1u = square side
- 1u = 0.331 × mark size (M)
- 1u = 0.465 × mark visible width
- M = 3.024 × 1u

The mark has a literal square baked in.  
Its side length is the system's unit of measure.

### HORIZONTAL LOCKUP

#### CONSTRUCTION

- Horizontal gap**  
Set to 1u — the side length of the mark's square.  
Measured mark visible right edge to wordmark left edge.
- Visible height**  
Mark's visible content (the chamfered hex) equals the wordmark's ascender height. Extremes match.
- Mark size, M**  
The full viewBox dimension. Hex visible content occupies 71.1% of M. Wordmark height = 0.721 × M.
- Vertical align**  
Mark visible top = wordmark ascender top.  
Mark visible bottom = wordmark baseline.

#### FORMULA

WH = 0.721 × M  
1u = 0.331 × M  
gap = 1u

### STACKED LOCKUP

#### CONSTRUCTION

##### Mark above wordmark.

Both centered on a shared vertical axis.  
Gap = 1u from mark visible bottom to wordmark ascender top.

#### DIMENSIONS

|              |                                                              |
|--------------|--------------------------------------------------------------|
| Total height | 2.01 × M                                                     |
| Total width  | 2.21 × M                                                     |
| Use          | narrow surfaces, app icons, social avatars, vertical layouts |

### CLEAR SPACE

#### RULE

##### Minimum clear space = 1u.

No other graphic element, text, or page edge may enter the 1-unit zone around any lockup.  
The same rule applies to the mark used alone and the wordmark used alone.

04

# Colour.

Four colours, each with a job. No greys, no gradients, no decoration.

## Forest leads. Terracotta accents. Ink structures.

Bone holds the page. The palette never grows — every shade comes from these four.

### USAGE PROPORTIONS

| Color      | Proportion | Usage                         |
|------------|------------|-------------------------------|
| Forest     | 60%        | primary surfaces and the mark |
| Ink        | 25%        | typography, hairlines         |
| Terracotta | 15%        | accents, links, callouts      |

Bone holds 100% — it is the surface beneath everything else.

### IN CONTEXT

### ROLE FLIP

## Same four colours. Different jobs.

In dark mode, Ink becomes the background and Bone becomes the type. The mark and accents keep their values — Forest stays Forest, Terracotta stays Terracotta.

No tinted greys. No off-blacks. No alternate palette.

06

# In use.

The system applied — to surfaces, screens, and printed things.

The same mark, the same type, the same palette. Always.

Consistency is the discipline. Six contexts, one set of rules.

BUSINESS CARD · APP ICON

**Business card**  
3.5" x 2" — bone surface, lockup top-left, terracotta accent

**App icon**  
Bone mark on forest, rounded-square container, iOS / Android conventions

SOCIAL · PITCH

**Social post — 1080 x 1080**  
Forest surface, bone lockup and type, terracotta only for the link

**Pitch slide cover — 16:9**  
Bone surface, centred lockup, single tagline, footer plate

WEB HEADER

**Website header**  
Lockup top-left, terracotta secondary CTA, forest primary CTA — palette working in proportion

07

# Don'ts.

What breaks the system. Nine ways to get it wrong.

## The mark is the mark. The type is the type. No substitutions.

Each violation below has been considered and rejected. Don't re-litigate them.

DON'TS

01 · DO NOT

**Recolour the mark.**

The mark is forest. Always forest.

02 · DO NOT

**Tint segments individually.**

Segments aren't separate. The mark is one shape.

03 · DO NOT

**Rotate the mark.**

It is built around an axis. Tilting it ruins the grid.

04 · DO NOT

**Add effects.**

No shadows, glows, gradients, or strokes.

05 · DO NOT

**Crowd the clear space.**

Minimum 1u (one square side) around any lockup.

06 · DO NOT

**Stretch the wordmark.**

Aspect ratio is fixed. Render at any size, but only proportionally.

07 · DO NOT

**Re-set the wordmark.**

Fraunces, outlined to paths. Never re-typed.

08 · DO NOT

**Put it in a container.**

No circles, no boxes, no badges. The mark holds itself.

09 · DO NOT

**Use low contrast.**

The mark must be clearly readable. Bone, Ink, or fully contrasting surfaces only.

# Scales.

Functional shades, derived from the four. Same hue, different jobs.

## Every shade lives on the same OKLCH spine.

Lightness changes for function. Chroma drops only at the extremes, where it has to.

FOREST

|                                                                                   |                                                                                   |                                                                                    |                                                                                     |                                                                                     |                                                                                     |                                                                                     |

ARTICLE

## A heading, stacked clean.

Lead paragraph at body-lg, 17px.

Body copy at 14px sits below the lead, with 1.55 line-height giving it room to breathe. Body and lead share the same hanging point.

SPEC CALLOUT

1u  
= 0.331 × M

The square's side. Every gap on the page is a multiple of this.

SEE SPACING SCALE

10

# Spacing.

Built on 1u — the same square that carries the mark.

## Every gap is a multiple of 1u.

1u is the side of the mark's square. At a 48px mark, 1u = 16px. Everything else scales with it.

| THE SCALE                                                                           |       |        |                                                  |
|-------------------------------------------------------------------------------------|-------|--------|--------------------------------------------------|
| VISUAL                                                                              | TOKEN | PIXELS | USE                                              |
|    | 0.25u | 4px    | Tightest — icon-to-label gap, paired elements    |
|    | 0.5u  | 8px    | Close — internal padding inside small components |
|    | 1u    | 16px   | DEFAULT — standard gap between elements          |
|   | 1.5u  | 24px   | Comfortable — between content rows, card padding |
|  | 2u    | 32px   | Section — small section breaks, inset margins    |
|  | 3u    | 48px   | Major — sections within a page                   |
|  | 4u    | 64px   | Block — between major content blocks             |
|  | 6u    | 96px   | Page — page section spacing                      |
|  | 8u    | 128px  | Hero — page margins, hero composition spacing    |

1u scales with the mark. At any size, 1u = the side of the mark's square.

### IN USE

BUTTON

width = 11.25u

Continue

Internal padding:  
0.5u vertical  
1.5u horizontal

Buttons feel tight because their padding is, deliberately. Add 1u outside before another element.

LIST

Card title 1  
Supporting line of text.

Card title 2  
Supporting line of text.

Card title 3  
Supporting line of text.

card padding: 1.5u · gap: 1u

Lists breathe at 1u. Tighter feels rushed, wider feels lost.

PAGE SECTIONS

Section C

Related sections at 2u. Independent sections at 4u or more.

12

# Icons.

Twenty-four icons on the same grid, in the same hand.

24-grid. 1.5px stroke. Round caps. Geometry that echoes the mark.

One icon language. Built from the same primitives — rectangles, circles, lines, small radii.

## CONSTRUCTION

| RULES         |                                      |
|---------------|--------------------------------------|
| Grid          | 24 × 24                              |
| Padding       | 2u inset (artwork in 20×20)          |
| Stroke        | 1.5px                                |
| Stroke caps   | round                                |
| Joins         | round                                |
| Corner radius | 2px (matches mark r=4 at scale)      |
| Color         | currentColor — inherits from context |
| Default fill  | none (outline icons)                 |

Search at 360px on a 24-grid. Terracotta inset shows the 20×20 safe area.

# Illustrations.

Twenty-one line drawings. One stroke weight. Same hand throughout.

## Shape as object.

Outline only, no fills. Round caps, round joins. Two to four shapes per piece. Generous negative space. Terracotta appears as stroke color where warmth fits the subject — sun, sail, flame, what is held, where a path leads. The system is the discipline; the discipline is the system.

# Explainers.

Eight illustrations. One concept each. Built for landing pages and product tours.

## Different metaphors, same vocabulary.

Each one earns its composition from the concept — focus, topology, flow, transformation, loop, trajectory, hub, cycle.

01

### Sell with confidence.

Kithos helps your team win deals it would otherwise lose.

Know what opportunities deserve attention. Get the full gist of what's happening and what should happen next.

02

### See where revenue is most likely to come from.

Learns your product, market, customers, accounts, and outcomes.

Turns context into clearer commercial decisions, ranked by likelihood.

03

### Sales, with less friction.

Collaborate with Kithos, your team, and all your existing tools.

Get work done and achieve outcomes without leaving where you already work.

04

### Move the right deals forward.

Account research, buyer priorities, signals, outreach, objections, and history — in one view.

Good accounts stall when every touch starts from scratch. This is the antidote.

05

### Build the playbook as you sell.

Every reply, meeting, objection, win, and loss sharpens the next move.

Captures what happened, finds patterns that work, turns them into shared commercial memory.

06

### Tools, insights, confidence.

Everything you need to crush sales.

A confident, accelerating motion built on the stack you already have.

07

### Get your reps in.

When a rep leaves, their know-how shouldn't leave with them.

Every account worked compounds into a base everyone draws on. New reps inherit it on day one.

08

### Scattered to self-improving.

A revenue motion that gets sharper every loop.

From individual effort to collective intelligence. From episodic wins to compounding gains.
